

Ten Year Fire Blanket Warranty

Bridgehill AS warrants all unused fire blankets free from manufacturing defects that decrease the purpose of the blankets. A Bridgehill fire blanket has a shelf-life warranty of **ten years** from the manufacturing date*.

Bridgehill is always striving to be the market leader in strength- and temperatures of fire fabrics. In the nature of its extreme core fabric and coating process it is inevitable that minor surface defects occur. Small holes, up to 1 cm/ 0.4 inches in the core fabric of the fire blankets are natural due to the sewing method, this does not alter the purpose of the fire blankets.

Customer shall notify Bridgehill's distributors in writing and supplying evidence, such as pictures, within the warranty period of any claim under this warranty.

An approved warranty reclamation will grant a replacement of the product.

*Manufacturing date can be found on the corner label on the fire blanket.
